

CUMULATIVE TEST OVERVIEW

Assessments that are easy to score can be useful tools as snapshots of learning. Multiple choice, selected response, and short answer problems that assess grade level content standards are organized into 10 unit-specific Test files. They are intended to be combined to make cumulative assessments of some desired length.

After a unit is completed, students will continue to practice skills and concepts in Spiral Review. Therefore, when possible we encourage the administration of cumulative tests several weeks after the completion of units.

Tests are available in .DOC and .PDF formats to make customization convenient. All test items are correlated to the grade level CCSS-M Content Standards.
